A Fearful Tragedy—A Man Killed by a Dog.

On yesterday, we came into possession of the particulars of a most singular and fearful tragedy, which recently occurred in one of the mountain Counties of this State. The gentleman from whom we receive our information has requested us to give neither the name of the County in which the horrible scene took place, nor the names of the actors in it; in the first place, because the families of the parties are among the best and most respectable in the County, and should not be subjected to this additional mortification, for an act which they can, in no manner, be held responsible; and, in the second place, because publicity would now, in no way, subserve the ends of justice, as the guilty party has already expiated his crime by so fearful a punishment. We will only preface our account of the matter by stating that our information was derived from a well known and highly esteemed gentleman of this city, and may be safely relied upon as perfectly correct in every particular.

In one of the mountain Counties of Georgia there lives two families, each before the war noted for its wealth and refinement. Since the war, the families, (whom we shall call respectively R. and L.) though they had, like nearly every one else, lost everything by the conflict, still retained the high position in society which they had for some long time filled. One of them, the L.'s, lost several of its members, as well as its fortune, by the war, and at the commencement of our story consisted of Mr. L., a gentleman fifty-five years of age, his wife, nearly the same age, and an unmarried daughter of about twenty-five. In about a quarter of a mile of their house lived one of the R.'s, a young man, who had recently married a very beautiful young lady of the County, and having left the paternal mansion, was farming by himself on a small tract of ground. The two families lived some distance from the County town, in a sparsely inhabited section of country, and being each the nearest neighbor of the other, were, of course, on terms of great intimacy. Between the young wife and the daughter of Mr. L. a fast friendship was soon formed, both being nearly the same age and of similar tastes and disposition, and relying upon each other for company in the daily absence of the two gentlemen, who were engaged in superintending the business of their farms.

A few days since, Mr. R. informed his wife that he had received a letter, which would compel immediate attendance in Atlanta, where he would have to remain for several days, and as it would be inconvenient for him to take her with him to that city, advised that she should ask her young neighbor to stay with her during his absence. The next morning he set out in his buggy for Atlanta, and his wife during the morning went over to L.'s house for the purpose of inviting her young friend to stay with her. When she arrived there she told the young lady of the absence of her husband; representing how lonely she would find her house at night, from the fact that she employed no house servant, and her cook, together with the few laborers employed on the farm, slept at the "negro quarter," nearly half a mile from the dwelling house, and ended by asking Miss L. to spend the nights with her until her husband returned. The young lady, after consultation with her mother, readily assented to the proposition and promised to come over during the afternoon. Having accomplished her purpose and feeling very much relieved in mind, Mrs. R. returned home, and spent the day performing the usual household duties. When the morning had passed away and the afternoon came and then the sun-set, without bringing her friend, she felt no alarm, but thought that the latter had decided not to come until after tea, when the father, across the field, which separated the two houses, would escort her. Accordingly the evening meal was eaten, household affairs arranged, and the cook dismissed for the night to her distant cabin at the "quarter." About 9 o'clock, Mrs. R. began to feel a little uneasy, as Miss L. had not yet come, when a servant came up to the house and brought a note from her expected friend, stating that she would be unable to spend the night with her, as she had promised, for her father, from some cause or other, had positively refused to give his consent to the arrangement. After delivering the note the servant took his departure, and the brave woman prepared to spend the night by herself. Feeling that she had a protector in a large and very fierce yard-dog belonging to her husband, she took him into her bed-room, and after securing the house, she lay down and resigned herself to sleep.

About 12 o'clock, she was awakened from her slumbers by a noise in the house and the angry growling of the dog, and discovered that the hall door had been forced, and that some one was standing at her room door, seeking an entrance. Speaking as loudly as her fright would let her, Mrs. R. asked, "Who is there?" A man's voice, which she did not recognize, replied by telling her to "open the door." Again she asked the same question, and again received the same reply, the stranger adding, that if she refused, he would "break the d—n door down." During this

dialogue, the dog, still growling, crouched upon the floor, as if ready to spring. Thinking to intimidate this man, who sought her ruin, Mrs. R. cried to him that if he forced the door she would shoot him. Laughing scornfully, the ruffian threw his weight against the light door, burst it open, and entered the room—when, quick as thought, the savage dog sprang forward and fastened on his neck. The man, astonished at this sudden attack, attempted to kill the dog with a knife which he had in his hand, but unsuccessfully, and the powerful animal dragged him to the ground, still retaining his hold upon his throat. Stunned at first by this unlooked-for deliverance, the woman, in a few seconds, regained her presence of mind somewhat, ran screaming from the house, never stopping until she arrived at the place of the L.'s, where her cries soon aroused the family. Her tale was rapidly told, and the servants were preparing to go to the scene of danger, when suddenly Mr. L. was missed, and his wife, almost on the instant, as if struck by a sudden presentiment, screamed, "Merciful God! it must be my husband!" With a cry of horror, the party set forth, and ran as fast to the house of Mrs. R. as the latter had run away from it a few minutes before. Arrived there, they found the man still on the floor, and the dog still grasping his throat. Beating him away from his prey, they found the suspicions of Mrs. L. but too correct; it was her husband—but the teeth of the dog had done their work, and he was dead.

It appears that he had returned to his home at 5 o'clock on the previous evening, and hearing of the departure of R., and the intention of his daughter to spend the night with the young wife, he positively refused to allow her to do so, assigning some frivolous cause for the refusal. That night he left home, saying that he was going to sit up all night with a sick neighbor, who lived some miles distant. It is supposed that he concealed himself in the woods until midnight, and then, influenced by unholy lust, forced an entrance into the house of R., to violate the person of the wife of the latter. When the case became known, the most intense excitement prevailed in the County, and had not Providence punished the criminal, he would probably have been hung to the nearest tree by the enraged populace.—Augusta Chronicle and Sentinel.

A writer from Newport gets off the following about the "long beach": "This favorite resort is just now in all its glory, and hundreds daily invade Neptune's domains, and toy with the wild waves. Omnibusses commence running about 9 in the morning, and from that time a steady stream of carriages and pedestrians, from dawn until 1 o'clock, when the red flag is run up and the gentlemen alone are allowed on the premises. As a rule, the plebeians are on the ground first, much to the annoyance of the aristocracy, when they arrive later, and some indignation is manifested when they find the boxes all occupied and are obliged to wait their turn. But first come, first served. In the surf all shades of society are represented, and for a time all social distinctions are washed out. The rich and the poor, gay and grave, cultivated and uncultivated, combine to make up the scene. The fairest ladies that yesterday graced the avenue, and that last night, at the Ocean House, danced to the admiration of every spectator, are among them. But what a change—bare headed, with bare feet, minus hoops, stays, chignons, rats, curls and paniers, and all other aids to feminine beauty, they stand jumping up and down in the water, looking like so many lunatics. Surely nowhere but on the beach would our belles appear before hundreds of lookers-on in such attire. Certainly they do not present a very picturesque appearance, with wet clothes clinging tightly to them and scanty locks of wet hair dabbling down their shoulders. Really the female head is a study indeed, and as I sit on the beach I can but admire the profusion of golden locks as their owners enter the bathing houses; but, strange to tell, they next appear to my view, like Samson of old, shorn of it all. Naughty men have peered within these houses while the fair ones were in the bath, and most wonderful stories have been told of their contents."

A New York correspondent tells of a "clean broke" young man, not yet twenty-seven, who not many years ago was preaching from a provincial pulpit, and with such eloquence, boy though he was, that crowds flocked to hear him, and he was the wonder of the day. Then away he went to fill some higher pulpit, and for a time he had before him a brilliant future. But of a sudden he struck "ile"; it may have been that the parable of the wise-foolish virgins had begotten within his soul a wholesome desire to keep his lamp well fed with petroleum; but, at all events, he went into speculation, doffed the robes, made a balloon ascension, and now has to dodge behind the Astor House pillars to avoid the law.

A Chinese hod-carrier who fell from a ladder in San Francisco, striking the pavement so violently as to make a dent there, has started for Washington as an applicant for the consulship at the D'Entrecasteau Islands, carrying the dent as a recommendation.

Special Notices.

A Card—Southern Life Insurance Company, Atlanta Department.

To the People of South Carolina:
The above Company was organized in 1866, in consequence of the wholesale forfeiture of Southern policies by Northern companies. The unparalleled success of the enterprise has forced several of these companies to restore their Southern policies, from the fact that they could not operate in our midst without the appearance of honesty.

We keep all our money at home to build up our impoverished country—every dollar of premium being safely invested in the State from which it is derived. The institution is purely Southern, and hence should appeal with great force to the patriotism and sympathy of every Southern heart.

'Tis not our purpose to make war on other companies, but to exhibit the special advantages offered by this purely Southern Company—founded on patriotism and solid wealth. Its ratio of assets to liabilities—the true test of a company's strength, is second to none on this continent—being nearly 300 to 100.

Whenever and wherever we have presented the claims of this Company, it has not only enlisted the sympathies of our people, but has also secured their hearty co-operation. We have secured 500 policies in South Carolina since the 10th of February. We number among our Directors Gen. Wade Hampton and Col. Wm. Johnston, gentlemen well known to every citizen of South Carolina. We appeal personally to the people of South Carolina to assist in pushing forward this deservedly popular Southern institution.

J. H. MILLER,
General Agent Southern Life Insurance Co.
B. W. LAWTON, State Agent.

We cheerfully recommend the above Company to the patronage of the citizens of South Carolina.

Lawton, James Patterson, Johnson Hagood, July 23 2mo.

SUMMER PERILS—HOW TO ESCAPE THEM.—It will not do to trifle with the health in hot weather. Vigor oozes through the skin at every pore, and it is by physical vigor only that unhealthy influences can be baffled and repelled. The vital elements are evaporated in perspiration. Intense heat converts a man into a self-acting pump, and the moisture that is pumped out of him is derived from the well-springs of life within him. There is a great need, therefore, that these sources of physical strength should be in a condition to bear, without danger or inconvenience, the extraordinary drain. If they are not in such a condition, the individual becomes languid and low-spirited.

The main thing is to keep the digestive apparatus in good working trim; for if the stomach, the purveyor of the system, does its duty thoroughly, the bowels, the brain, and the nervous system, being duly nurtured, will be likely to do theirs. In view of these facts, it is manifest that a powerful and wholesome vegetable tonic like HOSSETT'S STOMACH BITTERS is especially required at this enfeebling season. It is the most admirable of all correctives and invigorants, and for this reason—it does not over-stimulate the system. The proportions of aperient, tonic and stimulating components are so judiciously graduated, that the processes of invigoration and purification go on simultaneously, and no undue excitement is created in the circulation or the brain. All unmediated stimulants, however pure, excite the pulse and the nervous system. Their exhilarating effect is temporary, and when it passes off, the physical and mental depression they were employed to remove returns in an aggravated form. But this is not the case when HOSSETT'S BITTERS are taken at all correctives and invigorants, and for this reason—it does not over-stimulate the system. The proportions of aperient, tonic and stimulating components are so judiciously graduated, that the processes of invigoration and purification go on simultaneously, and no undue excitement is created in the circulation or the brain. All unmediated stimulants, however pure, excite the pulse and the nervous system. Their exhilarating effect is temporary, and when it passes off, the physical and mental depression they were employed to remove returns in an aggravated form. But this is not the case when HOSSETT'S BITTERS are taken at all correctives and invigorants, and for this reason—it does not over-stimulate the system. Their exhilarating effect is temporary, and when it passes off, the physical and mental depression they were employed to remove returns in an aggravated form. But this is not the case when HOSSETT'S BITTERS are taken at all correctives and invigorants, and for this reason—it does not over-stimulate the system. The proportions of aperient, tonic and stimulating components are so judiciously graduated, that the processes of invigoration and purification go on simultaneously, and no undue excitement is created in the circulation or the brain. All unmediated stimulants, however pure, excite the pulse and the nervous system. Their exhilarating effect is temporary, and when it passes off, the physical and mental depression they were employed to remove returns in an aggravated form. But this is not the case when HOSSETT'S BITTERS are taken at all correctives and invigorants, and for this reason—it does not over-stimulate the system.
